What is your ITAM Maturity, and why does it matter?

At a glance

IT Asset Management (ITAM) Maturity reflects the level of sophistication and effectiveness in managing an organization's IT assets.

Organizations progress through maturity levels from ad hoc to optimized, improving process formalization, control, and strategic alignment at each stage.

Achieving higher ITAM maturity brings significant benefits, including cost savings through optimized asset utilization, enhanced compliance, reduced risk, improved operational efficiency, and better alignment of IT assets with business goals.

With strategic investment in tools and training, and a commitment to continuous improvement, organizations can reach advanced maturity levels, ensuring their ITAM processes are robust, efficient, and aligned with international standards.

Importance of understanding

Why should you care about your ITAM Maturity?

-  Higher ITAM maturity enables cost savings through better tracking and optimization of IT assets.
-  Mature ITAM processes aid in ensuring compliance with software licensing agreements and regulations, reducing legal risks.
-  Advanced ITAM practices streamline processes, reducing downtime and improving productivity.
-  Accurate IT asset data supports strategic decision-making aligned with business goals.
-  A mature ITAM framework, guided by standards like ISO/IEC 19770-1, enhances governance and accountability.
-  Improved ITAM maturity strengthens security by identifying and mitigating risks associated with IT assets.
-  Efficient hardware management ensures timely maintenance and optimal use of physical assets.

Take the test

The ITAM Maturity Self Assessment by ITAM Accelerate takes a best-in-class ITAM process experience and combines it with automated AI based report generation to provide you with insights as to your organisations maturity, and where it needs to focus if it wishes to climb the ITAM maturity ladder.

Benefits

Benchmark

ISO19770-1 aligned maturity score to objectively assess your current state against industry best practice

Improve

Identify concrete areas for improvement across your organisation to create actionable steps to climb the ITAM maturity ladder

Repeat

Bake this assessment into your annual reviews to illustrate and evidence maturity improvement over the lifetime of your program

Taking the Assessment

The ITAM Maturity Assessment

An on-line assessment that streamlines the ITAM maturity information gathering process, drilling down to discover how governance, people, systems and processes drive continuous improvement to underpin how an organisation handles its IT assets. Once completed a detailed findings report with insights and actions is generated using Licensewares AI to provide an easy to read gap-analysis from which to build a roadmap for improvement.

🤝 Collaborate on demand

Invite relevant team members and stakeholders to collaborate on particular topics and to answer specific questions based on their role and expertise, providing clarity regarding ownership and responsibility for specific areas.

👏 177+ questions made easy

You can revisit the assessment throughout the completion phase allowing you to take your time in understanding the question and to gather any required information before answering. Additionally to this you can track your progress and start to see the report generating as soon as you answer questions.

👉 The sections

✅ ISO Maturity

Understand how your procedures align with the ISO19770-1 standard

✅ SAM Maturity

Understand how your procedures align with the industry leading Software Asset Management standards

✅ HAM Maturity

Understand how your procedures align with the industry leading Hardware Asset Management standards

Under the hood AI ✨

Licensewares LLM (large language model) considers all of the questions and answers, trained with relevant context, to automatically generate detailed and actionable reports.
