SOC for Service Organizations

Why should you care about Java?

🔭 At a glance

Java is the backbone of countless applications worldwide.

As a business, understanding your Java licensing requirements and costs can mean the difference between an optimized budget and unnecessary overspending.

Oracle recently updated their licensing model from the traditional "named user plus" and "processor" metric to total employee count.

The number of licenses required is **determined by the number of employees** rather than just the number of employees who actually use the programs.

1 install could mean millions!

⏱ **<0.02 secs**
Avg. analysis duration per device
💰 **<$0.5 /device**
Low cost subscription

🐷 **$10,000+**
in cost savings based on 100 employees with 1 Java install

📒 Importance of Analysis

Why should you care?

⚠️ Your Oracle Java fee's could increase from 2x-10x based on the new employee metric

⚠️ 3,000 employees at $432,000 per year
 40,000 employees at $2.5 million per year

⚠️ Older Oracle Java versions can come with costly support contracts or may have security gaps that need addressing

⚠️ Oracle Java has a call home function so usage can be monitored by Oracle themselves

⚠️ Audit disputes often lead to a costly commercial settlements, but sometimes it can lead to a lawsuit

⚠️ There are significant cost benefits and risk avoidance opportunities when conducting analysis assessments

⚠️ Understanding what you have deployed is the first step in remediation and potential displacement (shifting away from Oracle Java to an alternative)

💡 The solution

Automated Oracle Java license assessment using **any data source**, providing valuable insights at a fraction of the cost and time.

🪙 Benefits

⭐ **Visibility**
Understand your Java requirements under all license models + visualize your Java deployments clearly so you can make informed decisions.

⭐ **Time**
Near instant license analysis using your currently available data sources, reducing time to value vs traditional methods which can take months.

⭐ **Repeatability**
The ability to repeat Oracle licensing analysis consistently at any scale means significantly improved risk and cost management.
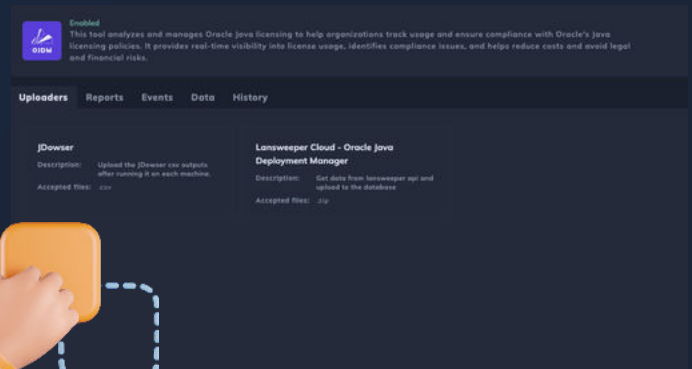

How Licenseware makes it easy

Oracle Java Deployment Manager

Designed to help gain control of Oracle licensing. OJDM analyzes and helps manage Java licensing, it enables organizations to track usage and ensure compliance with Oracle's Java licensing policies, providing real-time visibility into license usage, identifies compliance issues, and helps reduce costs, avoiding legal or financial risks.

Step 1: Upload raw data

Licensewares products are data agnostic, whilst we have a list of "supported sources" - we will ingest data from any customer discovery tool.

For Java we recommend JDowser a free solution built by Azul or Lansweeper is a great low costs discovery tool!
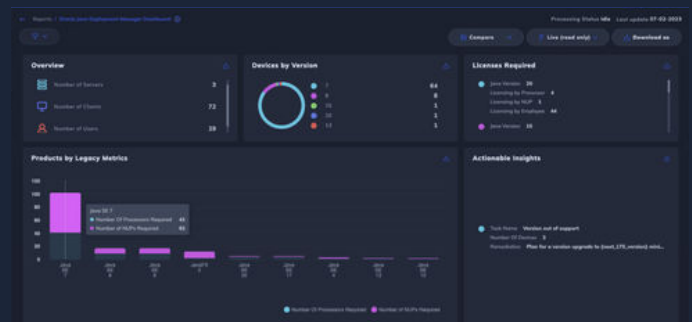

Step 2: Click process
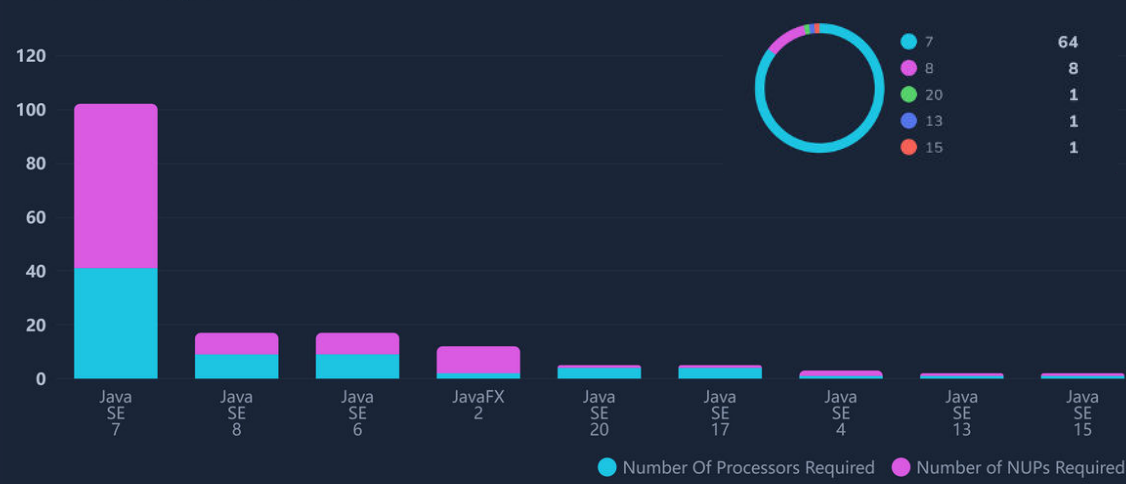

Step 3: Get results

Required Oracle Java licenses based on your organisation's specific licensing model (Named User Plus, Processor Licensing, or Java SE Universal Subscription)

Total licensing costs across different Oracle Java versions and licensing models
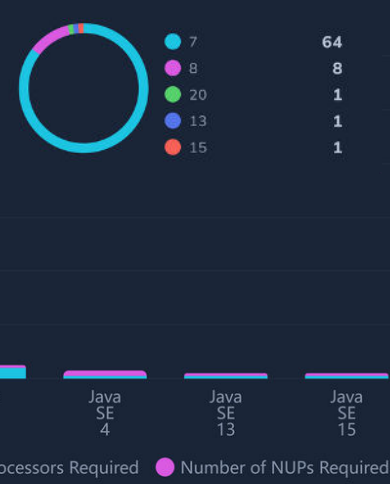

Potential cost savings through alternative solutions, upgrade paths, or negotiation strategies 🤑
